Consolidated with Case Numbers: )  
C 576 324, C 576 416, C 576 323 )  
C 576 325, C 629709 )

I, Richard McNamee, do hereby declare:

11

1           1. I am a Certified Public Accountant and have been since graduating from the  
2 University of Illinois in 1983. I have a Masters in Taxation from DePaul University. I have a broad  
3 range of financial and tax accounting experience with an emphasis on the tax aspects of transactions  
4 that includes insolvencies and reorganizations, acquisitions, buy-outs, and restructurings for both  
5 private and publicly-held entities. I have been a consultant to Covanta Holding Corporation  
6 ("Covanta") since November 2005 with regards to the transactions entered into between Covanta  
7 and the California Commissioner of Insurance ("Commissioner"), concerning the Mission Insurance  
8 Company Trust ("MICT"), Mission National Insurance Company Trust ("MNICT") and Enterprise  
9 Insurance Company Trust ("EICT" and collectively with MICT and MNICT, the "Trusts"). I make  
10 this Declaration in support of the Joint Motion to Approve Final Valuation of Latent Deficiency  
11 Claims, Individually, and in the Aggregate Against the Mission Insurance Company Trust and  
12 Allocation of Shares of Covanta Stock Pursuant to the Rehabilitation Plan Implementation  
13 Agreement (the "Joint Motion").

14           2. I have participated, in certain material respects, in the process undertaken by Covanta  
15 as required by the Rehabilitation Plan Implementation Agreement dated as of January 11, 2006  
16 between the Commissioner and Covanta ("Implementation Agreement") to identify the holders of  
17 Latent Deficiency Claims ("LDCs") and to determine the amount of each of the individual LDC  
18 holder's claim. This process is described in detail in the Declaration of C. Guerry Collins filed in  
19 support of the Joint Motion. In paragraph 30 of the Implementation Agreement, the parties thereto  
20 defined LDCs as a forum of Deficiency Claims (as that term is defined in the 1990 Agreement of  
21 Reorganization, Rehabilitation, and Restructuring (the "RRR Agreement") which would have  
22 qualified as a Deficiency Claim except for the application of the factors described in paragraphs  
23 30(a)-(c). The calculations I have done, as described in this Declaration, provide the analysis for  
24 Covanta's review of the preliminary determination of LDCs for MICT to provide to the  
25 Commissioner as required in paragraph 31(d); and, formed the basis for the Commissioner's and  
26 Covanta's agreed upon distribution of Covanta stock to conform to the requirements of the Internal  
27 Revenue Code in effect, on the date of the RRR Agreement, as required in paragraph 31(e).

28           ///

1       3. I was provided with a balance sheet for MICT, dated as of March 31, 2008 (the "Q1  
2 2008 MICT Balance Sheet"), by the California Department of Insurance's Conservation and  
3 Liquidation Office ("CLO") which showed that MICT has currently reserved specific amounts of  
4 cash for future contingencies, the unused portion of which will ultimately be distributed to holders of  
5 DCs. I noted that a liability has been recorded on Q1 2008 MICT Balance Sheet for DCs in the  
6 aggregate amount of \$301,581,363. Because future recoveries of cash by MICT and investment  
7 income on cash held by MICT will both be used to reduce outstanding DCs, I then undertook an  
8 analysis to estimate future cash to be available to reduce DCs. Based upon the Declaration of Stefan  
9 R. Boshkov provided to me, I understand that this analysis was necessary to determine whether  
10 future distributions of shares of Covanta stock held on behalf of MICT claimants, would comply  
11 with the requirements of Internal Revenue Code former section 108(e)(8)(B) ("Code section 108").  
12 Based upon the Q1 2008 MICT Balance Sheet and projections of potential future cash collections  
13 and future investment income, based upon an assumed interest rate utilizing a forward curve analysis  
14 as of December 31, 2007 plus 200 basis points, I have estimated that the amount to ultimately be  
15 distributed to DC holders will be \$280,438,141. A model incorporating the assumptions concerning  
16 the method and calculations of such amount, together with a projected distribution of funds to  
17 holders of DCs and setting forth the assumptions relied upon in making such determinations, is set  
18 forth in the Excel spreadsheet attached hereto as Exhibit A. Assuming a distribution of  
19 \$280,438,141 to DC holders, such distribution would reduce the total unpaid DCs to \$21,143,222. I  
20 am informed and believe and on that basis state that the cash currently held by MICT under the  
21 terms of California Insurance Code Section 1025, the RRR Agreement and Implementation  
22 Agreement will be distributed solely to the holders of DCs and not to the holders of LDCs.

23       4. Consistent with the foregoing, I allocated this \$280,438,141 of estimated distributions  
24 on a pro rata basis among holders of all DC claims. After reducing the DCs for such projected  
25 distributions, I then reviewed the preliminary allocation of shares of Covanta stock. I was provided  
26 with information from Covanta and the Commissioner which showed that the Commissioner and  
27 Covanta had agreed that the 1,172,874 Covanta shares initially distributed to the Commissioner to be  
28 held for the benefit of holders of DCs against MICT, including LDC holders, would be preliminarily

1 allocated following approval of the Implementation Agreement by the Court, as follows: 800,946  
2 shares for the DC holders and 371,928 shares for LDC holders. Attached hereto as Exhibit B is an  
3 Excel spreadsheet setting forth an analysis under the sub-heading "Preliminary Allocation"  
4 determining that the foregoing preliminary allocation of Covanta shares did not satisfy the  
5 requirements of Code section 108. To determine whether allocations of shares of Covanta stock held  
6 on behalf of MICT claimants satisfied the requirements of Code section 108, Exhibit B sets forth  
7 calculations to demonstrate that the distribution of the Covanta shares is not de minimus (i.e., a  
8 "nominal" or "token" distribution) and that each such distribution of stock to each DC Claimant and  
9 each LDC Claimant (as each such term is defined in paragraph 5 below, each individually herein a  
10 "Claimant") will be such that the indebtedness exchanged for stock within each class of claim holder  
11 (the "Stock to Debt Ratio") for each such Claimant will at least equal 50% of the total indebtedness  
12 exchanged for stock on an aggregate basis (the "Total Stock to Debt Ratio"). The Stock to Debt  
13 Ratio was established as the ratio of the value of the shares of Covanta stock received by each such  
14 Claimant to the amount of such Claimant's indebtedness cancelled or exchanged for shares of  
15 Covanta stock in this proceeding. The Total Stock to Debt Ratio was established as the same ratio  
16 used for establishing the Stock to Debt Ratio but substituting in that ratio (i) for the numerator, the  
17 value of the stock received by all Deficiency Claims, (that is, the sum of the DCs and LDCs), and (ii)  
18 for the denominator, the totality of the Deficiency Claims cancelled or exchanged for shares of  
19 Covanta stock in this proceeding. As I determined that simply using the number of shares of  
20 Covanta stock to be distributed produced mathematically identical results that would be obtained by  
21 using the value of such shares to produce each of these ratios, I utilized the number of Covanta  
22 shares for the value of these same Covanta shares for purpose of my analysis. Specifically, as  
23 illustrated in Exhibit B, the Stock to Debt Ratio (calculated by dividing the total number of shares of  
24 Covanta stock available for distribution for a class of holders of DCs or LDCs by the total dollar  
25 value of claims, as adjusted, within such class of claimants), did not meet the criteria and  
26 requirements of Code section 108 for each class of holders of DCs or LDCs because, in all cases,  
27 such ratio as measured on a class of Claimants basis was not at least equal to 50% of the Total Stock  
28

1 to Debt Ratio (calculated by dividing the total number of all shares of Covanta stock available for  
2 distribution by the total dollar value of all claims). [(See, Lines \_\_\_\_ and \_\_\_\_ of Exhibit B).]

3       5. In order to satisfy the requirements of Code section 108 while at the same time  
4 preserving all interests of DC holders, I then consolidated individual claim files by payee and  
5 identified the following three distinct groups by payee: (1) holders of DCs only ("DC Claimants");  
6 (2) holders of LDCs only ("LDC Claimants"); and (3) holders with both DCs and LDCs ("DC/LDC  
7 Claimants") and proportionately allocated Covanta shares by DC or LDC claims, as appropriate,  
8 within each class of DC Claimants, LDC Claimants and DC/LDC Claimants. As illustrated in  
9 Exhibit B, I recalculated the Stock to Debt Ratio (calculated by dividing the total number of shares  
10 of Covanta stock available for distribution by the total dollar value of claims, as adjusted, within  
11 each class) for each of the foregoing three classes of Claimants. In this way my analysis and  
12 allocation (as set forth under the sub-heading "Final Allocation" in Exhibit B) addresses the  
13 requirement in paragraph 31(e) of the Implementation Agreement that the allocation of Covanta  
14 shares jointly proposed by the Commissioner and Covanta satisfies the criteria and proportionality  
15 requirements of Code section 108 with respect to each group of Claimants because, in all cases, the  
16 Stock to Debt Ratio, as measured on a class of Claimants basis, was at least equal to 50% of the  
17 Total Stock to Debt Ratio. [(See, Lines \_\_\_\_ and \_\_\_\_ of Exhibit B).]

18       6. I was provided by the CLO (which manages the day-to-day operation of the MICT  
19 liquidation proceedings) with the name of each payee as well as the liquidator's assigned number for  
20 each individual proof of claim, and the amount of each DC, which I then consolidated for each DC  
21 Claimant identified in the Excel spreadsheet attached hereto as Exhibit C and used in my  
22 calculations of claims of each DC/LDC Claimant identified in Exhibit C.

23       7. I was provided by Covanta's claim review team with the results of their reviews and  
24 analyses of the LDCs for each of the claimants identified on the Excel spreadsheet attached hereto as  
25 Exhibit C. This consisted of the amount of the LDC for each identified LDC Claimant, as calculated  
26 in accordance with the provisions of the Implementation Agreement.

27       8. Under my direction the lists of holders of LDCs (provided by the Covanta claims  
28 team) and DCs (provided by the CLO) were collated and compared so as to be able to identify those

**Locke Lord Bissell & Liddell LLP**  
100 South Grand Avenue, Eighth Floor  
Los Angeles, CA, 90071-3119

1 claimants which had only DC claims, those claimants which had only LDC claims, and those  
2 claimants which had both DC and LDC claims.

3        9. Attached hereto as Exhibit C is a comprehensive list, organized by payee (Column  
4 A), setting forth the aggregate amount of claims of each of the Claimants and identifying the amount  
5 of DCs and LDCs, respectively, if any, held by each of the Claimants in Columns B and D,  
6 respectively, setting forth the shares of Covanta common stock to be distributed to each Claimant  
7 with respect to their DCs in Column C, the shares of Covanta common stock to be distributed to  
8 each Claimant with respect to their LDCs in Column E and the total shares of Covanta common  
9 stock to be distributed to each Claimant set forth in Column G. Each column of Exhibit C is then  
10 totaled to confirm that the individual calculations conform with and tie to the amount of total DCs  
11 (Column B), total LDCs (Column D) and total claims (Column F) used in Exhibit B. In addition,  
12 Exhibit C confirms that the total number of shares distributed to holders of DCs (whether in their  
13 capacity as a DC Claimant or DC/LDC Claimant) (Column C) and to holders of LDCs (whether in  
14 their capacity as a LDC Claimant or DC/LDC Claimant) (Column E), conforms with and ties to the  
15 total number of shares set forth in Exhibit B.

16        10. The spreadsheet attached hereto as Exhibit C contains calculations which spread the  
17 Covanta shares available for distribution (i) to the DC Claimants proportionately among such DC  
18 Claimants; (ii) to the LDC Claimants proportionately among such LDC Claimants; and (iii) to the  
19 DC/LDC Claimants proportionately based upon the type of claim (DC or LDC) held within such  
20 group in order to be consistent with the requirements of Code section 108.

21 I declare under penalty of perjury under the laws of the State of California that the foregoing  
22 is true and correct. Executed this 13<sup>th</sup> day of June, 2008 at Chicago, Illinois.

Richard McNamee
